Proportional Technology

Continuous control of pressure and flow

SENTRONIC^D

- Pressure control
- Digital control technology
- Programmable via RS232
- Pressure range: 0 to 10 bar
- Connections: G1/8" to G3/8" and subbase-mount version

SENTRONIC^{PLUS}

- Pressure control
- Fast-acting regulation behaviour
- Pressure range: Vacuum to 50 bar
- ATEX Version
- Connections:
 - G1/8" to G1"
 - ISO3
 - various subbase-mount versions

PULSTRONIC II

- Pressure control
- Stable pressure control at continuous flow
- Quick pressure changes
- Pressure range: 0 to 10 bar
- Connection: G1/4"

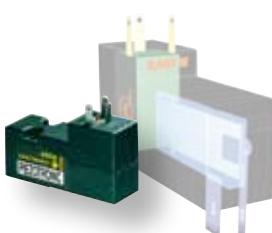

SERVOTRONIC^{DIGITAL}

- Pressure control
- Fast-acting regulation behaviour
- Excellent flow characteristics
- Pressure range: 0 to 40 bar
- Connection: G3/8"

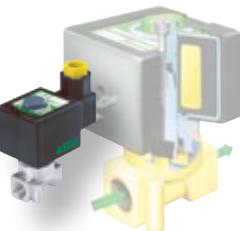

FLOWTRONIC^D

- Flow control
- Digital control technology
- Extremely low sensitivity
- Flow from 10 to 2000 l/min (ANR)
- Connections: G1/4" to G1/2"
- Programmable via RS232

PIEZOTRONIC

- Flow control
- Extremely low power consumption: < 0,07 W
- > 1 billion cycles
- Pressure range: 0 to 8 bar
- Connections:
 - Subbase mount version
 - M5
 - G1/8"

POSIFLOW

- Flow control
- Precise regulation
- Pressure range: Vacuum to 16 bar
- Connections: M5 to G1/2"

PRECIFLOW

- Flow control
- Suitable for extremely low flow rates
- Maximum repeatability
- Pressure range: Vacuum to 10 bar
- Connections:
 - M5
 - G1/8"
 - Subbase mount version

POSITIONER^D

- Flow control
- Digital control unit for angle-seat valves
- Connections: G1/2" to G2 1/2"
- Programmable
- Analog input or frequency signal input for turbine flow sensors

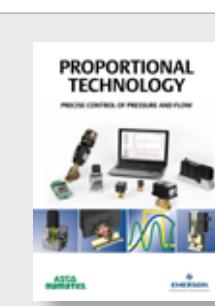

CONTROL^D

- Control of flow / pressure etc.
- Digital control technology
- Programmable
- Analog input or frequency signal input for turbine flow sensors
- Cascade controller

MOTORFLOW^D

- Flow control
- Wear-free flat rotary slide disc made from oxide ceramics
- Low power consumption
- Pressure range: Vacuum to 10 bar
- Connection: G3/4"
- Analog input or frequency signal input for turbine flow sensors

Solenoid and Pressure Operated Valves

for liquid and gas fluids

2/2 and 3/2 solenoid valves, direct operated

- Pressure range: Vacuum to 150 bar
- Function: NC, NO, U
- Connections: M 5 to G 3/4"
- Materials:
 - Body: Brass, stainless steel, plastic, aluminium
 - Seals: NBR, FPM, EPDM, CR, PTFE
- Solenoid voltage:
 - DC (=) 24V
 - AC (~) 24 V, 115 V, 230 V
- Variants:
 - Explosion proof
 - UL
 - CSA

2/2- and 3/2 solenoid valves, pilot operated

- Pressure range: 0 to 350 bar
- Function: NC, NO, U
- Connections: G 1/4" to G 2 1/2"
- Materials:
 - Body: Brass, stainless steel, aluminium
 - Seals: NBR, FPM, EPDM, CR, PTFE
- Solenoid voltage:
 - DC (=) 24V
 - AC (~) 24 V, 115 V, 230 V
- Variants:
 - Explosion proof
 - UL
 - CSA

Valves, pressure-operated

- Pressure range: Vacuum to 40 bar
- Function: NC, NO
- Connections:
 - G 3/8" to G 2 1/2"
 - Flange: DN 15 to DN 150
 - Clamp, butt welding
- Materials:
 - Body: Bronze, cast iron, steel, stainless steel
 - Seals: NBR, PTFE

4/2-, 5/2-, 5/3 solenoid valves, direct or pilot operated

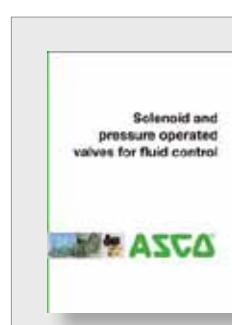

- Pressure range: 0 to 24 bar
- Connections: G 1/4" to G 1"
- Materials:
 - Body: Brass, stainless steel, aluminium
 - Seals: NBR, FPM
- Solenoid voltage:
 - DC (=) 24 V
 - AC (~) 24 V, 115 V, 230 V
- Variants:
 - Explosion proof
 - UL
 - CSA

Special Applications

Valves for:

- Low temperatures down to -196°C
- Combustible oil and gas
- Hot water and steam up to 180°C
- Vacuum
- Fuel dispensing systems

For more information,
please see our catalogue

asconumatics.eu

Process Technology

Solenoid pilot valves for valve actuation

3/2 pilot valves, direct acting

- In-line or Namur interface
- Pressure range: 0 to 50 bar
- Function: NC, NO, U
- Connections: 1/4" to 1/2"
- Materials:
 - Body: Aluminium, brass, stainless steel
 - Seals: NBR, FPM, (F)VMQ
- Temperature range: -50 to +90°C
- Power rating: 1.8 to 19 W

4/2-, 5/2-, 5/3- pilot valves, indirect acting

- In-line or Namur interface
- Pressure range: 2 to 10 bar
- Connections: 1/4" to 1/2"
- Materials:
 - Body: Aluminium, brass, stainless steel
 - Seals: NBR, FPM, VMQ
- Temperature range: -40 to +80°C
- Power rating: 0.4 to 11.2 W

Explosion-proof solenoid systems

- According to ATEX / IECEx:
Ex d, Ex em, Ex m, Ex ia, Ex nA
- International approvals:
GOST, INMETRO, KOSHA, NEPSI, NEMA, TIIS, CSA, UL, SAA

Accessories:

- Filter/regulators
- Exhaust protectors
- Cable glands
- Quick-exhaust valves
- Flow regulators

Valves for dust collector systems

- Full immersion tank systems
- Pilot boxes
- Remote pulse valves
- Integral pulse valves
- Sequential controllers

3/2 pilot valves, indirect acting

- Pressure range: 2 to 10 bar
- Function: NC, NO, U
- Connections: 1/4" to 1"
- Materials:
 - Body: Aluminium, brass, stainless steel
 - Seals: NBR, FPM, VMQ
- Temperature range: -40 to +80°C
- Power rating: 0.4 to 11.2 W

3/2-, 4/2- pilot valves with manual reset

- Pressure range: 0 to 17 bar
- Function: NC, NO, U
- Connections: 1/4" to 1"
- Materials:
 - Body: Brass, stainless steel
 - Seals: NBR, FPM, (F)VQM
- Temperature range: -50 to +90°C
- Power rating: 0.4 to 23 W

Pneumatic valve islands

- Compact design
- High flow
- Use in explosive atmospheres: ATEX zones 1/21 - 2/22
- Space savings of approx. 50%
- Pneumatic connection in the subbase (optional)
- Electrical control via Multipol or fieldbus

For more information,

asconumatics.eu

Custom Solutions

Medical technology

- Argon dosage for argon plasma coagulation

Industrial dishwashers and laundry washing machines

- Wastewater discharge valve

Automobile industry

- Proportional valve for the control of hydrogen supply in fuel-cell powered cars

Automation technology

- Central air supply unit for pick-and-place machines

Commercial vehicle technology

- Emergency manual operation of bus doors

Analytical technology

- Spectral analysis of materials

Medical technology

- Water management in dental treatment units

Laboratory technology

- Adapterblock made of PVDF (high-resistant plastic material used in chemical and biochemical technology) for a quality 3 ultra high purity water production system.

Automobile industry

- Electronic pressure regulators for the control of the application force of the electrodes of welding apparatus

Analytical technology

- Control of the supply of chemicals or aggressive inks. Plexiglas facilitates residue-free discharge.

Commercial vehicle technology

- Complete control module for bus door actuation

Commercial vehicle technology

- Manual switching valves for dump trucks

Automobile industry

- Injection valves for motors powered by natural gas

Handling / Automation

- Vacuum unit for gripping systems

Air Operated Valves and Pneumatic Valve Islands

Lapped spool & sleeve assemblies

- More than 200 million cycles
- Wear-free air bearing
- 1 µm clearance
- Self-cleaning
- Pressure and vacuum within 1 valve
- Short response times
- Optionally direct solenoid actuated

Line-mounted valves

- Steel spool for maximum service life
- Flows from 300 to 3,500 l/min (ANR)
- Connections: M5 to G1/2"
- Quick-acting valve with on/off response times of 6 / 6ms
- Namur interface

Pneumatic valve islands

- Steel spool for maximum service life
- Plug-In and discrete wiring
- ISO 5599/1 and /2
- ISO 15407-1 and -2
- Partly direct solenoid operated
- Flows from 130 to 5,300 l/min (ANR)
- Connections: M5 to G3/4"

G3

G3 fieldbus electronics

- Graphic display on every module
- Max. 1,200 I/O
- Up to 16 backplane extension modules / 512 valve solenoids per fieldbus node
- Speedcon M12 connector with metal thread
- Module replacement without dismantling manifold
- Interfaces to valve series ISO 15407/2, ISO5599/2, 2002, 2005, 2012 and 2035

Cylinders

- Micro-cylinders
- Short-stroke cylinders
- Compact cylinders
- Stopper cylinders
- Round cylinders

- Cylinders according to ISO
- Cylinders with tie rods
- Rodless cylinders
- Rodless cylinders with magnetic coupling
- Rotatable cylinders
- Cylinders with rod lock

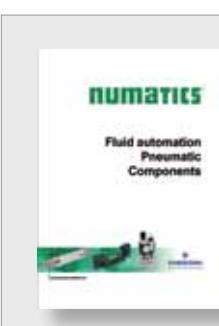

Air Service Equipment and Accessories

- Filters
- Regulators
- Lubricators
- Filter/regulator + lubricator systems
- Stainless steel filter/regulator + lubricator systems
- Lockout valves
- Soft-start series

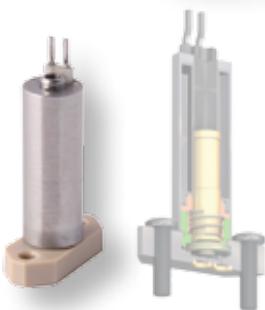

For more information
please see our catalogue

Analytical and Medical Technology

Fluid isolation valves, non-isolation valves and proportional valves

Diaphragm valves

- Gases and liquids
- Low dead volume
- Control of aggressive fluids
- Pressure range: 0 to 2.5 bar
- Connections: M5 to G1/4“, cartridge or flange

Rocker valves

- Width: 10 mm
- Gases and liquids
- Particularly suitable for high purity fluids
- Low heat transfer into the fluid
- Pressure range: -0.9 to 3 bar
- Connections: Flange, hose connection 1/4 - 28 UNF, 5/16 - 24 UNF

Flapper valves

- Gases and liquids
- High pressures at large orifice sizes
- Power-save function
Holding power: 2.5 W
- Pressure range: -0.9 to 10 bar
- Connections: G1/8“ and flange

Lever valves

- Gases and liquids
- High differential pressures and large flow volumes
- High ambient temperatures
- Pressure range: 0 to 5 bar
- Connections: Smooth spigots 8 - 11 mm O.D.

Bellows valves

- Gases and liquids
- Designed for use under harsh operating conditions
- Suitable for use with extremely corrosive fluids
- Pressure range: 0 to 6 bar
- Connections: G1/4“, G3/8“

Pinch valves

- Gases and liquids
- Uninterrupted flow path (zero dead volume)
- Flow in both directions
- Pressure range: 0 to 0.8 bar
- Connections: Tubes 1.65 mm to 9.5 mm O.D.

MICRO 10

- Width: 10 mm
- Neutral gases
- Low power consumption: 1W
- Suitable for mounting on multiple subbase
- Druckbereich: 0 to 10 bar
- Connections: Flange

Flat spring valves

- Gases and liquids
- Extremely short response times
- Very long service life
> 1 billion cycles
- Pressure range: 0 to 7 bar
- Connections: M5 or flange
